DETAILED ACTION

Allowable Subject Matter

Claims 1 and 2-23 are allowed.

Reasons for Allowance

Claims 1 and 2-23 are allowed since there is no prior art of record that teaches or suggests an electro-optical device and a method for manufacturing thereof comprising a relationship of various elements as claimed with the specific allowable subject matter cited in the following claims:

Claims 1, 18, 20 and 21:

a connection terminal unit comprising:

- a first conductive film formed over the first insulating film and that transmits at least a signal from an external circuit
- a second insulating film formed over the first insulating film and planarized
- an opening formed in an area of the second insulating film that corresponds to the first conductive film and that extends to the first conductive film

the electro-optical device further comprising:

- a storage capacitor including a pixel-potential-side capacitor electrode electrically coupled to pixel potential of the pixel electrode, and a fixed-potential-side capacitor electrode opposed to the pixel-potential-side capacitor electrode through an insulating film
- a capacitance line formed above the data line and electrically coupled to the fixed-potential-side capacitor electrode, the capacitance line being formed over

the first insulating film, and the first conductive film being formed of the same film as that of the capacitance line

Claims 3-17 and 23 are allowed since they depend on the allowed claim 1.

Claim 19 is allowed since it depends on the allowed claim 18.

Claim 22 is allowed since it depends on the allowed claim 21.
